

Valmet Information Security Policy

- Valmet is committed to moving its customers' performance forward. We take proper care of the information security and privacy of Valmet as a company, our employees and our customers. We provide our customers with a unique offering that is secure by design.
- The role and purpose of Valmet's information security policy is to protect the confidentiality, integrity and availability of the information assets of Valmet and its customers by managing and reducing the information risk.
- Information security is endorsed by Valmet's executive team and information security management at Valmet is organized to enable a continuous information security management process to meet the applicable requirements.

We fulfill our information security policy through our values:

Customers. We strive to take proper care of customer information assets and privacy and provide a unique offering that is secure by design.

Renewal. Our information security management process is based on continuous improvement through risk management. We promote new ideas to enhance the security of our operations and offering.

Excellence. Valmet's information security management process is based on best practices and standards. It is regularly audited, and the audit results lead to continuous improvement.

People. Information security is properly organized, and all Valmet employees take responsibility for it. Awareness is promoted through constant campaigns and training.

March 2019

Pasi Laine
President and CEO
Valmet
