

Critical factors for selecting an expert partner for recovery boiler tuning

Practical understanding of the primary factors that affect boiler operations

- Air distribution
- Liquor characteristics
- Liquor firing equipment
- Operator interface

Process knowledge of core liquor tuning variables

- Black liquor
 - Droplet size
 - Temperature
 - Pressure
 - Nozzles
- Combustion air
 - Air distribution
 - Air pressure

Tools and technology that optimize air and liquor operations

- Mobile furnace camera
- Bed camera
- Adjustable liquor spray stations
- Liquor spray station agreements
- Liquor nozzles
- Liquor gun cleaners
